PROFESSIONAL SUMMARY

Information Technology student with hands-on experience building mobile applications through academic projects. Familiar with Flutter, Jetpack Compose, mobile UI implementation, React Native Expo Go, REST API integration, and database management. Seeking a mobile application development or software development internship where I can contribute to practical, user-focused products and grow through real-world development experience.

EDUCATION AND CERTIFICATION

PHINMA University of Pangasinan — 2021 - Present

Bachelor of Science in Information Technology

- Specialized in System Development
- Certificate of Completion – AWS Cloud Computing Fundamentals

---

TECHNICAL SKILLS

- **Mobile Development:** React Native, Expo, Flutter, Jetpack Compose, Mobile Development
- **Languages:** JavaScript, Dart, Kotlin, Java, Python, C#, PHP
- **Frameworks and Tools:** React.js, Unity, Tailwind CSS, Figma, Git, GitHub, Blender
- **Databases and APIs:** MySQL, PostgreSQL, MongoDB, REST API integration

SELECTED PROJECTS

DermaScan | Mobile Skin-Analysis Application
***Mobile and Database Developer* - Python, Tensor Flow, Flutter**

- Developed an image capture and upload workflow for image-based skin-condition analysis.
- Integrated the mobile application with backend API endpoints to send images and retrieve analysis results.
- Contributed to database management for user and scan data while prioritizing accessible, user-friendly guidance.

Baskit | Grocery List Mobile Application
***Frontend and Backend Developer* - Jetpack Compose, PHP**

- Built a mobile application for organizing grocery lists, products, and planned purchases.
- Implemented code-based item retrieval to support faster in-store product access.
- Designed a clear interface focused on quick item entry and simple list management.

RxGuard: An AI-Driven Electronic Prescription and Medication Adherence System
***Frontend Developer and UI/UX* - Next.js, TypeScript, NestJS, PostgreSQL, Prisma, Docker, Python**

- Developed medication reminder and adherence-tracking features to help patients manage prescribed medications.
- Built dedicated web views for physicians and pharmacists to review patient care and medication activity.
- Organized prescription and adherence information to support easier monitoring and follow-up by healthcare providers.

Echoes of The Lighthouse
***Frontend Developer* - Unity, C#, Blender, Metamarks**

- Developed frontend game interfaces and player-facing elements for a 3D adventure game set on a mysterious island.
- Contributed to the exploration experience as players navigate landmarks and uncover the story surrounding the lighthouse.
- Focused on presenting clear, immersive interfaces that support gameplay and exploration.
